SUMMARY:

Dynamic Java backend developer with a passion for designing and implementing scalable, high-performance server-side applications. Committed to leveraging Java and related technologies to drive innovation and deliver robust solutions that exceed client expectations.

Technical Skills:

- **Programming Languages:** Java, Adv Java
- **Frameworks:** Spring, Spring Boot, Hibernate
- **Web Technologies:** RESTful APIs
- **DevOps Tools:** Docker, Kubernetes, AWS
- **Databases:** MySQL, PostgreSQL

Experience:

Software Engineer

Capgemini | January 2022 – Present

- Designed, coded, and enhanced financial software applications using Java/J2EE technologies, resulting in a 20% improvement in application performance.
- Contributed to ongoing feature development of web applications based on service-oriented architecture (SOA), ensuring seamless integration and scalability.
- Actively participated in design, architecture, and code reviews, fostering collaboration and maintaining code quality.
- Provided production support, including incident resolution and root cause analysis, ensuring uninterrupted operation of critical systems.

Projects:

Plant Nursery Management System (Spring Boot):

- Developed and maintained Java backend applications for a plant nursery management system, streamlining operations and improving customer satisfaction.
- Designed customer management functionalities for registration, login, and account management, resulting in a 30% increase in customer engagement.
- Generated sales reports and analytics dashboards to monitor revenue performance and sales trends, enabling data-driven decision-making.

Automation Travel Agency System (Spring Boot):

- Spearheaded the development and maintenance of Java backend applications for an automation travel agency system, optimizing booking management processes and enhancing user experience.
- Implemented booking management features to handle flight, hotel, and car rental reservations, resulting in a 25% increase in booking efficiency.
- Designed user authentication and authorization functionalities for customer registration, login, and account management, ensuring data security and privacy.

Certifications:

- Master Spring 6, Spring Boot 3, REST, JPA, Hibernate
- Java Spring Security
- The Complete SQL Bootcamp: Go from Zero to Hero

Education:

Bachelor of Engineering in Computer Engineering

SPPU, Pune | August 2017 – July 2021
